GASKET-REMOVER

Item Number 4688982

Our precision gasket removing tool equipped with two tips, is the ideal tool for gentle and safe removal of gaskets and O-rings on shafts and in bores. The unique shape of its two different tips allows for precise and efficient removal of gaskets and O-rings without compromising the surrounding parts. The knurled aluminum handle ensures a comfortable and secure grip during the operation.

- Single-piece tool with both rounded curved and 90° angled tips
- Designed for easy installation/removal of hard-to-reach gaskets and O-rings
- Allows for high precision in challenging installation and removal processes
- Handy aluminium handle, two different hooks made of alloy steel
- Total length: 170 mm
- Suitable for gaskets and O-rings of all sizes
